

The Death A Day App

"Believe me, if a man doesn't know death, he doesn't know life."

-- Lionel Barrymore in *Grand Hotel*

The famous and infamous die every day – and now there's an app to indulge your macabre curiosity about them! Dearly Departed's *Death A Day* is a light-hearted look at the dark side of Hollywood, right on your iOS device.

Peppered with odd and little-known facts, this daily dose of celebrity death sends push notifications every day, alerting you to the "deathiversary" of a different deceased celebrity on that date. Open up the app and you'll find details on where they were born, where and how they died, and where their earthly remains rest.

Inspired by Dearly Departed founder Scott Michaels's longstanding and wildly popular "Find A Death" message board and website, the app is constantly being refreshed with "new arrivals" making for more than 365 awful stories and fascinating pages.

Death A Day is free to download on the Apple App Store and Google Play. For more information, visit deathaday.com.
